

# FORMACIÓN

## TARGET

Let know to workers what kind of risks, operations and movements (access, stay, rescue, exit) are needed.

## TRAINING: CONFINED SPACES

Confined spaces or bad access spaces are relatively common on industries. We find some situations where we have to go inside them, or doing some works on them it's needed. There are high risk operations, due to possible dangerous gases accumulation and low fresh air flow.

To all this must be added the difficulty to access, assist and evacuate a possible injured victim.

The workers must know all kind of risks that exists, and how to proceed against them, in all access, stay, evacuation and exit methods.

## CONTENTS

### THEORETICAL MODULE

- Relevant regulations and standards
- Confined spaces – Definition and examples
- Different works on confined spaces
- General risks on confined spaces
- Specific risks on confined spaces
- Personal Protective Equipment (PPE's)
- Equipment: Maintenance and inspection

### PRACTICAL MODULE

- Access, stay and exits from confined spaces
- Victim rescue
- Basic Rescue knots

## TRAINING: CONFINED SPACES

Center	CONAPRO
Address	Pol. Ind. Ampliación Morea Sur Nave D3 31191 (Berriain)
Focused to	All kind of workers
Duration	6 hours
Certification	Gets the skills to access to confined or bad access spaces
Program	Theoretical: 2 hours Practice: 4 hours
Facilities	<ul style="list-style-type: none"><li>• Training classroom. 20 people capacity</li><li>• Training center to practices</li><li>• Confined spaces simulator</li><li>• Rescue equipment</li><li>• High experience training staff.</li></ul>
Price	750 €

**No minimum number of students required by company**  
**Maximum capacity: 6 students**
