

GROUP IV ADVANCED MECHANICAL-HYDRAULIC TRAINING

ULTRA PROPORCIONAL VALVE (UP TOWER REPAIR ACTIVITIES)

DESCRIPTION

At Ventum Academy we reinvent high-level training through a series of advanced courses to equip those professionals responsible for mechanical-hydraulic operations with the knowledge, skills and real experiences of high added value and great technical complexity.

* To access this training at Ventum Academy it is an essential requirement to complete the four BST modules according to the GWO standard.

** For this training it will also be necessary to have basic technical training according to the BTT standard, mechanical qualification or to accredit two years of experience in maintenance in the wind sector.

OBJECTIVES

Proportional valve cleaning and verification.

CONTENT

- Detailed description of the operation, reviewing work instruction and risk assessment.
- Preparation of the necessary PPE, tool and special tools required for the operation.
- Performing verification and cleaning of proportional valve without the need for component change, necessary adjustments and commissioning.

PREREQUISITES

PREREQUISITES NEEDED
GWO BST FOR ALL FORMATIONS

Mechanical qualification + GWO BTT course or
Mechanical qualification + 2 years of experience on
maintenance on wind turbines

- Theoretical training hours: 0,5 days
- Practical training hours: 0,5 days
- Total duration hours: 1 days
- N° of participants: 6
- Price per participant: 975€
- Price per participant with full capacity of course: 731,25€
