

GROUP IV ADVANCED MECHANICAL-HYDRAULIC TRAINING

UTRA Replacement of rotating union seals (Up Tower Repair Activities).

DESCRIPTION

At Ventum Academy we reinvent high-level training through a series of advanced courses to equip those professionals responsible for mechanical-hydraulic operations with the knowledge, skills and real experiences of high added value and great technical complexity.

* To access this training at Ventum Academy it is an essential requirement to complete the four BST modules according to the GWO standard.

** For this training it will also be necessary to have basic technical training according to the BTT standard, mechanical qualification or to accredit two years of experience in maintenance in the wind sector.

OBJECTIVES

Checking and replacing hydraulic rotary joint seals

CONTENT

- Detailed description of the operation, reviewing work instruction and risk assessment.
- Preparation of the necessary PPE, tools and special tools required for the operation.
- Verification and replacement of the hydraulic rotary joint seals, assembly and commissioning

PRERREQUISITES

Mechanical qualification + GWO BTT course or Mechanical qualification + 2 years of experience on maintenance on wind turbines

- Theoretical training hours: 0,5 days
- Practical training hours: 0,5 days
- Total duration hours: 1 days
- N° of participants: 6
- Price per participant: 975€
- Price per participant with full
- Capacity of course: 731,25€
