

GROUP I LRP & SECURITY TRAINING

LOTO BASIC TRAINING (LOCKOUT-TAGOUT)

DESCRIPTION

At Ventum Academy we reinvent high-level training through a series of advanced courses to equip those professionals responsible for mechanical-hydraulic operations with the knowledge, skills and real experiences of high added value and great technical complexity.

* To access this training at Ventum Academy it is an essential requirement to complete the four BST modules according to the GWO standard.

** For this training it will also be necessary to have basic technical training according to the BTT standard, mechanical qualification or to accredit two years of experience in maintenance in the wind sector.

OBJECTIVES

Training in all LOTO systems used in the wind turbine, the requirements and situations in which its use is mandatory.

CONTENT

- All the necessary LOTO systems in the wind turbine as well as its direct machine application.
